

Nôtre Dames: Shelter for Domestic Abuse Victims

In response to the 2018-2020 Femicide Protests of France, Paris remodeled the recently at the time burned down Notre Dame Cathedral. Built in 1163, the old Cathedral was a one of many highly beloved tourist destinations of old Paris. But, the people recognized that it was time for a change and the old structure was turned into a shelter for Parisians facing domestic violence.

Vessel: A Shelter for the Homeless and Displaced

By far the most ever invested into a homeless and emergency aid shelter in the history of this country, the \$200M Vessel is located in the heart of Manhattan. A site strategically chosen to help the homeless population of the Vessel find work in some of the many Lower Manhattan kiosks and bodegas.

The Bridge of Liberty

The Bridge of Liberty was built using the internal structure of the old Statue of Liberty, which once stood on Liberty Island welcoming immigrants from across the world into the Upper New York Bay. Now the structure once again welcomes immigrants, but from the US-Mexico Border Wall. Parts of the wall still stand, though times have changed since the fascist government of the old United States has been overthrown. This wall commemorates those who suffered in the immigration detention centers located close to the border wall.
